

# The Great Race Adventure

## EI AVE

### Description:

In this race there are two teams, Team 1 and Team 2. You will travel across the country of Spain on their train system. Throughout your trip you will visit monuments and places of interest in various cities. Your mission is to get to the running of the bulls with enough money to enter the bull ring and watch. The running of the bulls costs approximately **1.500 pesetas**.

- Your team will be given **60.000 pesetas** to pay for transportation, food, and any other expenses that you may incur throughout your trip. Because each team member will have to pay the same amount for the train, food, and any other expenses, you only have to calculate the money for one person. For example, subtract the price of one train ticket from your budget for each trip. You do not need to subtract the price of the ticket for each member of the team.
- The average cost for each meal is \$5.00 USD, approximately **940.69 pesetas**.

### Purpose:

- To become familiar with searching the Internet.
- To become familiar with the geography of Spain.
- To explore various cities and monuments in Spain.
- To maintain a budget in order to get to the Running of the Bulls with enough money to enter.

### Procedure:

1. You have the first clue, which is your starting point. Search the Internet using words from the clue to find your starting place.
  - We recommend the following search engines: <http://www.yahoo.com> or <http://www.google.com>.
  - Type words from the clues given in your Internet browser window.
2. Once you find out the city of your starting point, you must go to your teacher. He/she will then give you a clue to your next destination. Use words from the clue to search on the Internet for your next destination. You will do this in order to find out each of your destinations.
3. After you find out your destination, you will need to go to **EI AVE Web site**, [http://www.raileurope.com/us/rail/fares\\_schedules/index.htm](http://www.raileurope.com/us/rail/fares_schedules/index.htm) in order to find out the train schedule to your next destination.
4. After you figure out your departure and arrival time, you will need to go to your teacher to find out how much your discounted student-ticket costs. Record this information on your sheet.
5. Next you will pick a number, between one and three. Based on the number you picked, your teacher will tell you if you have gained, lost, or kept the same number of pesetas.
6. You will write this in the blank labeled "other expenses", which may also include meals. You are required to eat **two meals a day**.
7. After you have been given the ticket cost and any other expenses, including meals, total your remaining balance of pesetas.
8. You are now ready to get the clue for your next destination from your teacher and start the process all over again.
9. Repeat steps 2-8
10. Hand in the completed worksheet when finished.
