

Vision Statement

To provide Arkansas schools with access to the curricula that will enable students to succeed in a multicultural society and develop into lifelong learners to enhance their personal, social, and intellectual growth.

Mission Statement

The Arkansas Department of Education Distance Learning Center consists of dedicated professionals who are committed to

1. Assisting schools in resolving faculty availability issues.
2. Using synchronous and asynchronous technology to enable flexible student course scheduling.
3. Assisting faculty in enhancing and enriching existing curricula.
4. Providing professional development and instructional support to faculty in incorporating technology and material into instruction and research.

We believe that all students in Arkansas should have access to the curricula that will empower them to achieve their educational and personal goals. In the technology-enhanced classroom, educators become facilitators, technology becomes the catalyst in launching students on their path of discovery, and students are engaged in expanding and satisfying their intellectual needs.
